***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The 10/3/05 amendments to the specification appear to introduce new matter. The original specification fails to disclose "7-Nitro-benz-2,1,3-oxadiazol". Furthermore when the Office enter 7-Nitro-benz-2,1,3-oxadiazol into a "Chemdraw" program, it appears a different chemical composition was drawn that is presently claimed. The "Chemdraw" strurcture is cited on the attached PTOL-892.

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 12 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ghosh (USP 4,358,595), Hones (USP 5,334,508) or Albarella (USP 6,872,573).

All of these references teach generic chemical structures that include the claimed general chemical structure.

***Response to Arguments***

Applicant's arguments filed 4/25/06 have been fully considered but they are not persuasive.

Applicants' argue Hones fails to teach the claimed method of using the claimed compound. The Office agrees Hones fails to teach the claimed method and only the composition claims have been rejected over Hones.
